

# **GP ANNUAL SURVEY**

We are aware that the **GP Annual Survey** ordinarily takes place at this time of year.

Historically, there has been a low response rate from patients at this practice.

We sincerely believe that patients who are happy often do not feel the need to feed back quite as strongly as those who are not.

**We would encourage all of our patients who are happy with our services to also add their voice.**

We feel this would give us a more representative view of how we can continue to improve our services.
